

GECKO

GLOBAL EVALUATION OF CHOLECYSTECTOMY KNOWLEDGE AND OUTCOMES

Primary Aim: To define global variation in compliance to pre-, intra-, and post-operative audit standards

Secondary Aims: To determine quality of gallbladder surgery provision globally including critical view of safety, bail out procedures, adverse events including bile duct injury and rates of unsuspected gallbladder cancer

30 days + 1 year follow-up

OUTCOMES

Primary Compliance to audit standards globally

Secondary

Rates of textbook outcomes for cholecystectomy	30-day + 1 year reoperation rates	Bile Duct Injury
30-day + 1 year complication rate (Clavien-Dindo classification)	30-day + 1 year readmission rates	Incidence of Gallbladder Cancer
