

## Gallbladder Cancer

The International Study Group on Gall Bladder Cancer was formed in Jan 2017 during the IHPBA meeting in Bangalore. Members of the steering group were present. The aim is to have a truly international group, which will include surgeons, medical oncologists, epidemiologists and pathologists who are focused on gall bladder cancer. A protocol was generated for the registry study along with consent forms and patient information leaflet to be submitted to the various ethics committees. Inputs from a patient support group (The Cholangiocarcinoma Foundation) were taken while developing these. The IHPBA Foundation provided further funding in 2020 to cover the following:

- Data Manager for one year (not happened due to covid pandemic over 2 yrs !)
- Admin support
- Meeting costs
- Medscinet monthly maintenance July 2021 - July 2022 (12 months)
- Medscinet - cost for merger of databases (Dutch, Korea/Chile) : this has not yet happened

To date, IRB submissions have been approved in 19 centres and 614 patients have been entered on the registry.

Country	Centre	Patients
Mumbai, India	Lilavati Hospital, P Jagannath	97
Buenos Aires, Argentina	Hospital Dr Cosme Argerich, Javier Lendoire	42
Tucuman Province, Argentina	Zenon Santillan, Segovia Rodrigo	38
Amadora, Portugal	Hospital Santa Maria da Feira (Antonio gomes)	29
Patna, India	AIIMS	20
Alicante, Spain	Alicante General Hospital	4
Delhi, India	Max hospital	1
Murcia, Spain	Virgen de la Arrixaca Hospital in Murcia	22
Caceres, Spain	Universitary complex of Cáceres	9
Guadalajara, Spain	Guadalajara Hospital	3
Barcelona, Spain	Mutua Terrassa Hospital in Barcelona	21
Madrid, Spain	Hospital la Princesa	3
Delhi, India	RGCI	138
Delhi, India	RR Hospital	79
Spain	Badajoz University Hospital	23
Bilbao, Spain	Cruces University Hospital,	36
Madrid, Spain	San Carlos Clinic University Hospital	16
Zaragoza, Spain	Medicine School of Zaragoza University	13
Vigo, Spain	Alvaro Cunqueiro,	13
Total		<b>614</b>

## Plans for 2022-23

### 1. Regional coordinators as Co PIs

GBC registry is global. In order to promote regional data bases, it is proposed to have regional coordinators in

North America – Shishir Maithel

South America – Xabier Arextbala

Europe – Philip dereuvier

Africa- Martin smith

S.Asia – Sujoy Pol, Bhawna Sirohi

East Asia – Jin Young Jang

### 2. Coordinator for Medscinet and medical oncology

Dr Bhawna Sirohi will coordinate the medical oncology inputs and also liaise with medscinet for improvements and import of data. We hope to complete this task this year 2022. This will lead to at least 2,000 patients by end of 2022

### 3. Publication

At least one publication is planned after data cleanup and entry by 2023

### 4. Data management:

Immediate appointment of Data manager in All India Institute of Medical sciences to speed up and coordinate the data entry from India and rest of the world.

### 5. Dutch Database -

The proposal by Prof DeReuver on having his PhD student process the GBC data and integrate with GBC registry will be supported.
