

Academic Activity in November 2017

We are doing our best to provide international standard of care in our department, HBPS, YSH with the help of international collaboration and international training.

Dr Winston W.L Woon, Consultant surgeon from Tan Tock Seng Hospital, Singapore used to visit our department since 2017 February for laparoscopic hepatobiliary and pancreatic operations. And assist us in laparoscopic liver and pancreatic surgeries and guide in animal lab performance. This time on November 30 and December 1, his colleagues, Dr Low Jee Keem and Dr Huey Terence, Consultant surgeons from Tan Tock Send Hospital came and visited us and participated in two laparoscopic pancreatic surgeries in two days. They showed us how to make good use of energy devices and assisted in these cases.

They left yangon on 2nd day of visit immediate after operation. We found advantages on sharing knowledge and improvement in our laparoscopic technique. By this collaboratin there would be mutual benefit in both sides and better care for our people.

Here are photographs taken during operations in OT.

1st day Laparoscopic pancreatic resection

2nd day operation

Pancreaticogastrostomy

Ampullectomy (WLE) for periampullary carcinoma
